

# Single Channel Speed Monitor for Rotating Equipment with SIL2 requirements E16521D.1

### Fast, precise and safe - from zero motion to highest speed

The BRAUN Single Channel Speed Monitor E16521D.1 for increased safety requirements is SIL2 / IEC 61508:2010 compliant. It monitors motors, pumps, feeders, gears, rollers, and small turbines and provides protection against overspeed at any required value of rotational speed, including standstill.

The signal input is specially designed for BRAUN A5S... sensors.

With single-channel processing (1001), safety provision is solely determined by the device configuration. Therefore the use of sensor monitoring with integrated plausibility control is essential. In such a case, no redundancy is provided. Should a fault be detected, the entire system will be shut down immediately.

With two-channel systems, there is a choice of implementation, dependent upon requirements. In principle, the two monitors operate in parallel yet independently. Alarm indication can be realized through the linkage of their Alarm Outputs.

For 1002 processing, we have system redundancy with enhanced safety through comparative diagnosis. In the case of fault detection, the entire system will be shut down. With 2002 processing, we still have system redundancy but with enhanced availability. Only if both monitors fail, the whole system will be shut down.

The E16521D.1 Speed Monitor permanently monitors the speed sensor for its correct function. During its complete useful lifetime of 20 years, the monitor does not require any external proof tests and is completely maintenance-free.

#### **KEY FEATURES**

- SIL2 / IEC 61508:2010 compliant
- Single Channel Monitor with sensor monitoring and self-test function
- Frequency range 0 Hz...50 kHz
- 1 Analog Output 0/4...20 mA
- Bright red digital LED display
- I Safety Output as DPST relay
- 3 Alarm Outputs, one as SPST relay and two as PhotoMOS relays
- Input for BRAUN A5S... sensors
- Square wave Pulse Output
- USB 2.0 Data Interface
- Two Monitors, suitably configured with their output contacts linked together, may provide a protection system with 1002 or 2002 redundancy
- Universal Power Supply range 20...265 Vuc

#### BENEFITS

- Fast, precise, and safe
- Maintenance-free during the lifetime, therefore minimized TCO
- Universal range of application, throughout mechanical and electrical engineering, in the chemical industry, in power plants, and at test stands
- Increased safety with 1002 architecture
- Maximum availability with 2002 architecture

### Specifications of E16521D.1

Conformity to Standards	Directives 2014/30/EU (EMC Directive) 2014/35/EU (Low Voltage Directive) 2011/65/EU (RoHS Directive) SIL2 acc. EN IEC 61508:2010, EN ISO	<b>Standards</b> EN IEC 61000-6-4, EN IEC 61326-3-2 EN IEC 61010-1 EN IEC 63000 13849:2008; PLc
Measuring Principle Accuracy Response	Frequency measurement, based on the input pulse distance, extended over a minimum period of time, programmable 5 milliseconds9.999 seconds. ±0.005% of value ±1 in last digit 1 input pulse interval + programmed minimum time + 5 milliseconds	
Analog Output Range Resolution Linearity error Drift by temperature	Isolated and protected against external short circuit. Current 0/420 mA with max. load of 500 ohms. High and low end of span programmable 12 bit (1 : 4096) <0.1 % <0.02% within 0+60 °C (+32+140 °F)	
Relay Outputs Setpoint adjustment Response characteristics UL contact rating Alarm state position Starter function	<ul> <li>1 Safety Output: OR1 as DPST,</li> <li>3 Alarm Outputs: OR2 as SPST, OR3 and OR4 as PhotoMOS (SPST).</li> <li>Individually programmable from zero speed up to any high speed</li> <li>Hysteresis individually programmable in its position and width</li> <li>Relay contacts OR1 and OR2: 30 Vdc, 2 A, 60 W resp. 250 Vac, 0.25 A, 62.5 VA, (inductive loads need external spark extinguishing device)</li> <li>PhotoMOS relays OR3 and OR4: 60 Vdc, 0.1 A, 3 W</li> <li>Individually programmable for excess, no power and input failure condition, starter period</li> <li>Released by external control signal (1224 V) to isolated input</li> <li>Extension programmable up to 999 sec.</li> </ul>	
Display	5 digits with red LED figures, 10 mm high, with adjustable decimal point. Indicating the variable during operation, parameters during the programming phase	
Data Interface	USB 2.0 at USB-C front socket for programming	
Programming Data protection	Manually by front keys, alternatively via USB 2.0 (equipment required see optional accessories) Parameters safe-guarded against power failure and code protected against unauthorized access	
Signal Input Frequency range Signal level range Response levels Input impedance Scaling factor Suitable sensor types Sensor failure monitoring Sensor supply	Isolated circuit, responding to pulse signals 0 Hz50 kHz Maximum 30 V high at >6.5 V, low at <4 V 100 kohms Programmable by 5 digits, considering any relation to the variable All BRAUN A5S sensors Short-circuit or interrupt of supply, signal lead break sensors (with push/pull output only). A detected failure sets any of the alarms into a pre-programmable state. Approx. 13 V / max. 60 mA	
Pulse Output	Repeating the input signal, isolated and	push/pull with approx. 20 V level
Power Supply	Universal supply range 20265 Vuc. Po Insulation category Class 1	ower consumption approx. 5 W, resp. 5 VA.
Connectors (Wiring)	Screw mounting, 2 plug-in terminal blo	cks, accepting 0.22.5 mm <sup>2</sup> cross section
Environmental Conditions	Ambient temperature in operation: 0 Ambient temperature in storage: -40 Relative humidity max. 95%, non-cond	+60 °C (+32+140 °F) +85 °C (-40+185 °F) ensing
<b>Design</b> Dimensions Protection Grade Weight	Snap-on-track plastic enclosure for 35 r See drawing dimensions IP 40 for enclosure, IP 20 for terminals (also available in field mounting version, approx. 0.3 kg, resp. 1.0 kg for version	mm rail, field mounting enclosure (Option -G) on request with transparent cover IP 65/NEMA 4) -G
Optional Accessories	IS-RS232-E16: Data Stick with Interface Software to program parameters L3D07: Plug-in adapter cable, with USB-C plug (male) to device and USB-A plug (male) to PC L3D08: Plug-in adapter cable, with double-sided USB-C plug (male)

#### Enclosure

suffix -G = field mounting enclosure with transparent cover (omit if not required)

#### Examples:

E16521D.1 : Standard version for BRAUN A5S... sensors

E16521D.1-G : Version with field mounting enclosure with transparent cover

### BRAUN – Speed Monitoring and Protection Systems for Rotating Equipment

BRAUN Industrial Electronics develops, produces, and sells an array of "Rotating Equipment" protection systems for use in industrial applications worldwide, focusing on overspeed protection. These systems comply with the highest standards of safety and availability.

As a globally leading technology provider with over 60 years of experience, BRAUN has been continually meeting and mastering the challenges associated with protecting the facilities of companies within the power generation, oil, gas, and chemical industries. Our protection systems are installed in more than 100 countries worldwide, and our customers use them in safety-critical applications with rotating parts.

For our OEM customers, BRAUN is both a solution-oriented systems provider and a reliable partner.

Our solutions comprise a variety of products for the detection and monitoring of speed and related parameters.

Always matching the requirement. Always the perfect solution for safety and availability.
